We get closer to supply sources, promoting national and European options. We encourage reuse and recycling. Defending the planet means looking ahead, ensuring also the future of our industry

Natural resources are a gift of which humanity must show himself worthy, taking care of them. To slow down unique and finite resources exploitation, we turn our commitment to a growing use of materials renewable and responsible.

introduction punch

Our ceramic makes colour tangible, creating a surface on which tactile and visual sensations are permanently contaminated. From every combination of colours and materials comes something new and surprising, theatre of always different emotions.
